

TRESOC Bulletin

Wind Farm Invitation Day – 30th October!

TRESOC continues to make progress following the launch event on 10th September, with more members, more investment and more renewable energy projects under consideration!

Managing Director, Ian Bright left his job as renewable energy officer in Somerset on 15th October to devote himself full time to TRESOC - and reduce his notoriously large carbon footprint from driving to work! Negotiations with local partners on the Totnes Anaerobic Digestion Project are resuming after a lull in proceedings during the lead up to the Society launch.

There has been a fantastic response from volunteers helping to deliver the TRESOC Flyer to over half of the 11,000 properties in Totnes and Environs, coordinated through the TRESOC hotline 01803 867431. Further support is needed to make sure that all the householders in Cornworthy, Dartington, Dean Prior, Diptford, Halwell, Morleigh, Marldon, North Huish, Rattery and Staverton receive the information. If you would like to help please call 01803 867431, you might qualify for a mystery bonus!

And finally the Totnes Community Wind Farm Introduction Day will take place from 1-8 p.m. on Saturday 30th October at the Methodist Church Hall, Fore Street, Totnes. Come along and find out all about our flagship wind energy project at Luscombe Cross from TRESOC and Infinergy, our wind developer partner. More details on www.totnescommunitywindfarm.co.uk

TRESOC certainly feels welcomed in Totnes and its success depends on people continuing to send in their application forms and investment. We look forward to working with the new members of the Society to realise the full range of environmental, economic and social benefits from renewable energy. If you want to influence and hopefully profit from a community owned renewable energy enterprise, now is your chance! Details and Prospectus on www.tresoc.co.uk
